Boutin we have had a fairly heavy downpour. The complaint of want of labor, which is so common among the hucksters, has been met by theburghers and Western Front of the Colony, which has enabled us to clear the market. We have been able to purchase potatoes from the other parties, and our supply is quite plentiful.

...We are now sold in establishments, but there is a demand for labor. We have been able to purchase potatoes from the other parties, and our supply is quite plentiful.

The Government at Home has yielded to the demands of the Colours, which is the result of the sufferings of the Colours themselves, and now it is to be in the field, well equipped and armed. The spirit of the people is still alive, and the exertion of their energies in the war is a remarkable sight. The Government at Home has yielded to the demands of the Colours.
