COSATU is travelling the country to explain and discuss the ANC's plan for building a better life for workers.

And with twenty nominees from COSATU to bring the worker's voice to the national debate, you can be sure that workers' issues are going to be addressed under the ANC government. Issues like education and training, job creation, centralised bargaining, a living wage, maternity and child-care, health and safety.

Don't miss this chance to make your voice heard.
