

IS A VOTE FOR THE DEMOCRATIC PARTY A WASTED VOTE?

We know some people are worried by this question. They think we'll be too small to make a difference.

But if you're one of these people, we think there's something you should know. The DP can have an effect in Parliament out of all proportion to its size.

After all, we were hugely outnumbered at multiparty talks, and look what we did there.

We stopped the ANC putting their own judges in the highest courts. We made sure a new government couldn't

arbitrarily call a State of Emergency. We won more power for the regions. We even ensured your home couldn't just be taken away.

And when you consider **every 1% of the vote puts 4 DP members in Parliament**, you come to a startling conclusion.

There'll be a lot more DP representatives than you thought. With a lot more power than you thought.

So if you think a vote for the DP is a wasted vote, we'd like to tell you something.

The real waste would be not voting for us.

DEMOCRATIC PARTY. PROTECTING YOU FROM THE ABUSE OF POWER.
