## “The NP is committed to move mountains. Except one.”

*“The Cape is home to many different people and cultures. Yet they all have one thing in common - the wish to live in peace and harmony with each other in this beautiful part of our God-given country.”*

*For many years, the people at the foot of Table Mountain have been very near and dear to me. As leader of the National Party, I can tell you that my party has been doing everything in its power to let this area achieve its full potential.*

*Only by creating peace and prosperity can we attract both local and overseas investors into our region. Which will mean a stronger economy and job creation. Together with education, housing and health care, this must be treated with urgency and dedication to build a better environment for everyone.”*

State President: F. W. de Klerk

Five years ago the New National Party started out on a journey to achieve this under the leadership of President De Klerk. But it is to the credit of all our people that we have come so far, so fast, with so much willingness to understand each other and to build our new nation together.

*“Today we have the strength, the experience and the determination to live up to our promises. And a dedication to a strong economy, peace and a secure future.”*

We know what the future can be like. But we can only keep what we have and further improve life in our region if we all take hands and stand together. To ensure peace and prosperity for our children.

Don't just hope for a better life in the Cape of Good Hope. Vote for one.

**Be sure of a better life.**
