 Nutley, Sussex.

I.

Darling Mummy,

I am writing this to you while Catty is cleaning out the canary's cage to go up to London. The male canary is the one with the blue and white ring on his foot. The female has not got a ring. I am sure she wants to make a nest because she gets hold of cotton or string whenever she can, and she pecks at it and pulls it. We have not given her any nesting stuff, so I think that you had better give it to her. We saw the male one feeding her this morning, it was sweet, but I don't know why he did it, because she is not sitting on eggs. Catty has just come in here and she says that she thinks it is because the female is going to lay eggs, because the other two did the same thing.

The little one on eggs has only got two

eggs left, because as one got broken she only had three left, but the other day she knocked another one out by mistake and when Catty put it back in the nest, we think she ate it because it was cracked.

Well Mummy I had better stop now as the canaries are just going,
With tons and tons of love and hugs and kisses

from

your young Apie.
