## MILITARY COMMANDERS AS FOOD COMMISSIONERS

### Move Against "Profiteering"

Jerusalem, November 14th.

A SPECIAL Emergency Regulation under the Palestine (Defence) Order-in-Council has been enacted to provide for the appointment by the High Commissioner of all Military Commanders, who govern the defence and security measures of the different districts in Palestine, as special commissioners within their areas in respect of food supplies.

It will be lawful for them to take possession of any food, forage, fuel, material or stores, and any articles (including animals alive or dead) essential for the life of the community.

They are also empowered to give directions concerning the production, manufacture, treatment, use, distribution, sale or purchase of all such articles, and may fix maximum prices.

The latter move against possible "profiteering" has been deemed necessary owing to experience during the recent European international crisis when prices were forced up without justification.

The ban recently imposed upon the export of all foodstuffs, with the exception of citrus fruit, has now been removed. This was another measure dating from the crisis period when it was feared that excessive foodstuffs exports might deplete stocks in the country and cause a shortage in the event of a vital emergency.

IT was announced in the House of Commons by Mr. Malcolm MacDonald that a supplementary estimate will be laid before Parliament to enable additional financial assistance to be given to the Palestine Government as a result of the present situation.
